PRESENTS:

LENS LICKER™

Because fog is the real enemy.

Tired of watching your visibility disappear inside your Level A suit faster than your will to live? Meet the **Lens Licker™**—the revolutionary* internal lens-clearing system inspired by fish tank magnet tech and unsettlingly modeled after a human tongue.

Designed to be operated with one hand (or frantic slapping motion), **Lens Licker™** scrapes condensation, smudges, and regret right off your face shield with moist-like precision. Because nothing says “cutting-edge” like putting a synthetic tongue on your suit.

Product Features

- **Bi-directional Scrub-Tongue:** Simulates a licking motion for optimal lens clarity and maximum discomfort.
- **MagLock™ Interface:** Magnetic coupling secures the outer controller and internal “tongue” together across your face shield.
- **FogBite™ Texture:** Special micro-grooved licking surface simulates a cat tongue for enhanced moisture distribution.
- **Two Sizes Available:**
 - Large Tongue – For standard visibility zones
 - Extra-Large Tongue – For panoramic “Why is this still happening to me?” views

Use Cases

- Full encapsulation scenarios where internal humidity exceeds 85% and your will to wipe is gone
- Long-duration entries where your lens looks like a haunted shower door
- Demos where you’re trying to impress someone who shouldn’t be impressed by this

WHY CHOOSE HMAF?

- ✓ Over-the-top concepts
- ✓ State Of The Art Technology
- ✓ Smooth and refined
- ✓ Someone is approving this
- ✓ From our minds to your class

Optional Add-ons

- **Mint-Flavored Wipe Coating** – No functional purpose. Just vibes.
- **Bluetooth-Enabled Tongue Wiper Tracker** – So you never lose your licker.
- **Training Video** – Entitled “Lick Responsibly.”

**“IT’S LIKE HAVING A LOYAL
LITTLE HELPER TONGUE JUST
FOR YOUR FACE SHIELD.
HORRIFYING. BUT EFFECTIVE.”
– RICO D., TECHNICIAN &
RELUCTANT FAN**

ABOUT US:

HMAF is a Subsidiary of The Haz Mat Guys, Inc. bringing you the most badass ideas, concepts and products you’ll be asking yourself, why hasn’t someone thought of this already?
