PRESENTS: HOW TO SPILL HAZARDOUS MATERIALS... SAFELY™

They say, "Don't cry over spilled chemicals," but that's only if you spill them correctly. Welcome to How to **Spill Hazardous Materials... Safely™**, the first course designed to help you embrace the inevitable —and do it with grace, control, and a mildly concerned supervisor watching.

This course teaches the art and science of catastrophic mishandling, all while maintaining full compliance with **Risk-Based regulatory guidelines*** and vague best practices.

By the end of this course, you'll be able to:

- Identify the optimal locations for accidental release .
- Demonstrate advanced container tilting techniques with flair and plausible deniability.
- Choose the correct phrase between:
 - "That was already like that."
 - "This is actually a drill."
 - "We're gonna need a new containment area."
- Deploy warning signage while actively spilling, to maximize efficiency.
- Establish a **Spill Buddy™** system, because if you're going down, you're not going alone.

Bonus Content

- **Spill Selfies** – How to document your disaster for social media clout and internal memos.
- The "Oops Kit" – Build your own cleanup cache with paper towels, sarcasm, and hope.
- **Legal Statements Generator** – AI-generated excuses like:
 - "We followed the protocol we thought we remembered."
 - "That container had a weird vibe."

Key Modules

1. Intro to Liquid Chaos – Understanding viscosity, volatility, and oopsability.
2. Controlled Catastrophes – Making spills look purposeful.
3. Post-Spill Narratives – Writing incident reports that say a lot, but mean nothing.
4. The Power of Passive Voice – "The material was released." (By whom? Unknown.)

**"BEFORE THIS CLASS, I
SPILLED ACCIDENTALLY. NOW
I SPILL INTENTIONALLY,
STRATEGICALLY, AND WITH A
CLIPBOARD IN HAND. TOTAL
GAME CHANGER."
